

FIB cards usage outside Iraq

Dear Customers,

We would like to inform you that the current mechanism for settling international card transactions has been suspended, which affects the ability to use your card for international transactions effective as of **1st of June 2025**.

All other FIB services remain fully operational, including local card usage, payments at POS terminals, QR payments accepted at over 25,000 merchants, and full access to our digital banking platform.

We remain committed to developing banking solutions that meet your needs and expectations, and we are actively working on alternative settlement methods to reinstate this service in line with your aspirations.

Thank you for your understanding and trust.

With sincere regards,
Managing Director
First Iraqi Bank (FIB)
